NOAA's UAS Director Briefs OSTP Workshop on Drones & the Future of Aviation

Robbie Hood, the Director NOAA's UAS Program is a featured speakers at the White House Office of Science and Technology Workshop on Drones and the Future of Aviation August 2nd. She will be conducting a "Lightning Talks" on NOAA's Innovative Applications for Drones in Government and Industry. The "Lightning Talks" will be series of short talks, capped at no longer than 3-4 minutes.

The purpose of these talks is to highlight innovative positive applications for unmanned aircraft systems (UAS), and this session will allow an opportunity to shine a light on government, academic, and industry users maximizing the transformative potential of UAS technology in saving lives, increasing efficiency and quality of operations across a variety of applications, and transforming the way we analyze and move about our world.

The full working event agenda of the August 2nd proceedings is attached.

Is this is an issue of potential concern?
